

### ***Environmental policy for LignoTech***

LignoTech will contribute to a sustainable sound environment by the production and marketing of high quality binding and dispersing agents based on lignin, a renewable raw material resource. Lignin is extracted during the cellulose production process.

LignoTech has an environmental responsibility towards its employees, society and its customers. This responsibility is fulfilled in the following ways:

- Objectives and action plans are formulated so as to reduce the company's environmental impact.
- Empowering LignoTech's employees to take personal responsibility for the environment in their daily work.
- By performing risk analyses and preventive actions to assure high production safety.
- By openly displaying our environmental efforts and our environmental impact.
- LignoTech puts relevant environmental demands on its suppliers.

LignoTech is implementing ISO 14001 (LTS, LTN-Site)

BLT has signed the Responsible Care commitment.

This environmental policy is based on the environmental values professed by the Orkla group.
